

Manufacturers of

Materials Handling Equipment

and Process Plants

GRAIN TECH LTD
PROCESS EQUIPMENT

Multi-Outlet Bin Dischargers

Unique in that multiple outlets can be fitted, each having variable feed rates and capable of individual operation. Vibratory action provides constant performance under changing head load.

M.V. Feeders

Capacities in excess of 650 tonnes per hour. Trough type and tubular design are self-cleaning with variable feed rate.

Bucket Elevators

Standard machines or custom built to suit specific requirements. Belt or chain type to suit application.

M.V. Screens

High efficiency machines incorporating a wide range of screening media. Open or enclosed designs.

Screw Conveyors

E.V. Feeders

Instant and infinitely variable throughput capable of automatic control. Capacities in excess of 1000 tonnes per hour.

Single-Outlet Bin Dischargers

Each machine specification is based on dynamic and static angle of repose of product as handled.

M.V. Conveyors

Available in balanced design and up to 15 metres long. Features include product cooling, drying, and heating, also proportioning and distribution via intermediate discharge gates.

Also available:

- Pneumatic Conveying Systems
- Sifters and Screeners
- Pulverizing and Size Reduction Equipment
- Classifying, Screening, Sifting and Grading Equipment
- Batch and Continuous Mixers
- Pelleting and Agglomeration Equipment
- Belt and Chain Conveyors
- Dust Filtration Equipment

Bulk Handling Systems

Grain Tech offer a comprehensive service for the design, supply, installation, and commissioning of materials handling and processing plants. Consultancy services available.

Fabrication

Supplied as designed by Grain Tech, or to client's specification, in mild steel, stainless steel, or aluminium alloy. Manufacture includes bunkers, silos, support frames, and platforms. Grain Tech project design and development skills have been applied to the production and testing of clients' prototype machinery.
